

**Building relationships through your CRM.** Sendōgo offers the premier relationship marketing service that runs within your preferred CRM (Customer Relationship Manager) System. We provide a variable print-on-demand fulfillment service for CRM's all over the world. This service provides a collection of high-quality, professionally designed greeting cards we like to call, Impressions.

**Enhance Your Marketing** - As email open rates continue to weaken, there is one thing that does not fail, people always open their mailbox.

**Add A Personal Touch** - A greeting card received is 11 times more likely to be opened before any other piece of mail. We help you create the relationship before the transaction.

**Increase Sales** -People buy from people they know, like, and trust. Build the “know, like, trust” factor to work for you in today’s digital age.

**Repeat Business** - Customers and prospects who feel appreciated will, in turn, appreciate your business with incremental sales and referrals.

**Simple API** - Sendōgo’s API makes integration simple and allows for a quick implementation into your CRM.

## Premier Enhancement for your CRM

Stay top of mind and build lasting Impressions your clients are sure to remember.
